

# INFRARED AREA LIGHTING FOR NIGHT OPERATIONS.

The Baselight 320x IR is a fully IR portable light tower built on the proven 320x platform. Equipped with 6 high-powered 940 nm IR panels, it provides wide-area illumination for NVG operations without visible signature or detectable light spill.

## Airfield and LZ operations

Prepare remote landing zones without visible light to minimize the risk of exposure.

## Tactical briefings & command posts

Give briefings in the field at night.

## Surveillance and perimeter control

Illuminate wide areas without alerting intruders or exposing position.

## Search & recovery (IR only)

Enable night-time search and rescue in full IR mode.

## Training and exercise

Simulate operational conditions in military or police training environments.

## QUICK TO DEPLOY. EASY TO OPERATE.

The Baselight MIL series is specially adapted for military use. Thanks to its robust and high-strength materials, it sets new standards for intelligent, long-lasting area lighting under harsh conditions. Energy efficiency and dimmability means many hours of light with a minimal use of resources.

### Want customized colours for Baselight?

We can offer coatings in Cera Coat, NATO RAL colours and more.

## A FLEXIBLE PLATFORM FOR LIGHTS OR SENSORS.

In collaboration with a European defence supplier, we offer a unique mobile solution where our Basecase platform is used as a mast for:

- Drone detection
- Camera and thermal sensors
- Communication and surveillance units
- RF analysis and protection systems

The result is rapidly deployable protection and surveillance systems that can be positioned, moved and activated in a matter of minutes.

## ACCESSORIES

Rugged military style case with ergonomic handles and wheels.

Click-on wheels for rough terrain. Puncture-free & low-weight.
